

## Technical Specifications

### OUTPUT AND RESOLUTION

Adjustable screen orientation (0, 90, 180, 270) Support for the following resolutions:

1024X768, 1280X720, 1280X768, 1280X1024, 1366X768, 1600X1200, and 1920X1080

### MULTI-REGION DISPLAY

- Create unlimited regions
- Independent regions
- Regions can be layered and overlapped
- Regions support transparency
- Regions are scalable

### IMAGES

- Import standard image formats (.bmp, .jpg, .gif, .tif, .png) (PNG is recommended in Noventri Suite because of transparency support and small file size)
- Read images from a drop folder anywhere on the network
- Ability to re-scale, crop, rotate and tile images

### DIGITAL CLOCK

- Choose from multiple display formats (Date & Time)
- Choose multiple colors and sizes
- Create simple text effects

### TEXT AND DATABASING

- Manual text input
- Read text automatically from a text file
- Tab, comma, semi-colon, and user specified delimitations
- Read text from any installed fonts
- Choose multiple colors, sizes, and styles
- Create simple text effects

### TIME LINE

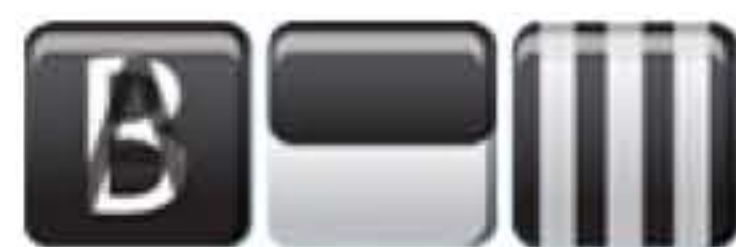

- Drag/insert pages into time line interface
- Time line interface is scalable in time
- Track duration of total time
- Entries can be scaled based on desired playback duration

### VIDEO FEATURE

- Full Screen Video Regions
- Bluray Quality HD MPEG4 & WMV

### TRANSITION EFFECTS

- Various transition effects for between pages

### SCHEDULING

- Schedule pages as far into the future as you need
- Schedule unlimited projects per screen
- Ability to repeat weekly schedule indefinitely
- Ability to easily expand and repeat schedule entries
- Schedule as override to not disrupt your previous schedules
- Ability to schedule to individual screens or groups of screens

### GROUPING

- Players can be grouped with simple check box interface

## MANAGEMENT

- Monitor all players with playback thumbnails
- Instantly stop, start, or reboot player / screen
- Ability to edit player time zones
- Ability to edit player names and locations
- Turn off encryption / decompression for faster publishing

---

## USER ACCOUNTS

- Multiple users with unique logins / passwords can be set up
- User's rights can be customized to only edit certain content
- Multiple users can work on the server simultaneously

---

## EMERGENCY ALERTS\*

- Pre-configured emergency messages can be programmed
- Emergency messages can be triggered with a simple button
- Emergency messages can automatically play on all screens

---

## SYSTEM REQUIREMENTS

For Noventri Suite and Noventri Server:

- Windows Operating System (Windows 7 or Windows Server 2008 R2 or above)
- Pentium 4 Processor
- 10/100BaseT Ethernet port (if using networked players)
- 512 MB RAM
- C++ Redistributable 2007
- 138 MB available on disk for program files
- Additional space on disk for content storage
